Education

University of Nebraska - Lincoln

Bachelor of Science in Software Engineering

GPA: 3.63/4.00

Sep. 2022 – May 2026

Lincoln, NE

Relevant course: Software Engineering (I, II, III, IV), Machine Learning, Software Design & Architecture, Data Modeling System, Design & Analysis Algorithms, Testing & Verification Analysis, Discrete Structure, Human-Computer Interact, Cloud Distributed Operating Syte

Technical Skills

Languages: Python, Java, JavaScript, TypeScript, C, C++, C#, Golang, HTML/CSS, SQL

Frameworks: Django, React, .NET, Flutter, Django REST Framework

Databases: PostgreSQL, MySQL, NoSQL, SQLite

Cloud & Tools: AWS (EC2, S3, CDK, Bedrock), Azure DevOps, Git, Docker, REST APIs, Postman

Experience

Product Manager

September 2025 - Present

Cui-Wang via Senior Design, UNL

Lincoln, NE

- Built a full-stack fintech platform on AWS (EC2, S3, Route 53, Bedrock) that automates municipal bond PDF parsing and surfaces key financial and legal insights.
- Served as Product Manager and Scrum Master, discovering sponsor needs, prioritizing features, and leading Agile delivery to ship the platform on time.
- Defined product vision and prioritized high-impact features to deliver meaningful value to investors and sponsors.

Research Assistant

May 2025 - Present

Large Language-Vision Model-Enabled Automatic Target Recognition

Lincoln, NE

- Designed and implemented a multimodal recognition pipeline combining LVLMS and YOLO to detect specified targets in electro-optical and infrared surveillance video.
- Developing feature extraction and matching algorithms to link textual descriptions with visual detections, using **datasets from the U.S. Air Force Research Laboratory**.
- Benchmarked system performance across precision, recall, and runtime efficiency, optimizing for real-time deployment in complex environments.

Teaching Assistant

August 2024 - Present

School of Computing, UNL

Lincoln, NE

- Consulted **250+ students** with debugging, optimizing code, and developing embedded system applications.
- Led hands-on lab sessions on **machine language programming, digital arithmetic, and input/output system management**.
- **Clarified students** in understanding and applying key concepts, including **Boolean Logic, Processor Organization, and Memory Management**.

Software Engineering Intern

June 2025 - Oct 2025

Ethos Connected

Lincoln, NE

- Implemented modules for multi-stage workflow tracking, and integrated troubleshooting, centralizing operational data across production and support stages.
- **Collaborated directly with supervisor** to design scalable cloud infrastructure and **ensure the system meets reliability and maintainability standards** for real-world deployment.

Software Developer

September 2024 - May 2025

BuilderTrend via Design Studio, UNL

Lincoln, NE

- Collaborated within a **cross-functional team** to contribute to the development and enhancement of Buildertrend's software solutions, participating in code reviews and **Agile ceremonies**.
- Worked with senior developers and a Microsoft coach to continuously **improve code quality** and adhere to **industry best practices, resulting in cleaner, more efficient code**.
- Experimented with **Large Language Models (LLMs) and text embeddings** to optimize data summarization and implement recommendation features by using **OpenAI API (using ChatGPT)** to elevating the user experience.
